

ABOUT ME

I'm a software designer and a user experience freelance consultant. I'm very motivated and I'm passionate by design and IT. I have an interdisciplinary education: I was trained for designing and programming user interfaces but also to ergonomics and UX methods. For 5 years now, I've specialized on designing ergonomic and user-friendly interfaces. I've been working on various fields as Air Traffic Management, Aerospace, Medical or Agriculture. I'm looking for exciting challenges to improve digital product quality and clients' satisfaction.

WORK EXPERIENCES

MAR 2019 - TODAY

Freelance | Toulouse

UX Consultant & HCI Ergonomist

Brief description : I help my clients to improve their digital product by designing intuitive and user-friendly interfaces.

Clients : CONDOR SAS, INGENUITY I/O, TESTAPIC

JUL 2018 - MAR 2019

Ingenuity i/o | Toulouse

UX Designer

Brief description : At Ingenuity, I helped my clients to define their product strategy and I conducted the UX processes with them. I worked with large corporate clients and start-ups.

Clients : EUROCONTROL, CONDOR SAS, INGENUITY I/O

OCT 2014 - JUL 2018

Soprasteria | Toulouse

UX Designer & IT Consultant

Brief description : I worked as a consultant at Soprasteria. I started my career there by programming HCI, but I quickly switched to work on product design and ergonomics. I have conducted the full UX process with my clients; from user research, interface design and interaction design to prototyping, testing and working with the development teams to implement the products.

Clients : DSNA-DTI, SAFRAN, AIRBUS, MAA

APR 2014 - SEP 2014

Testia | Toulouse

HCI Ergonomist & developper

Brief description : I ported a desktop application on a tablet. I was in charge of proposing an effective ergonomics by exploiting the multi-touch interactions and the tablet portability. I conducted a User-centered design process.

Clients : AIRBUS INNOVATIONS
